

Why Electric Tankless Water Heating

Efficient, Safe and Reliable

-  iHeat units are 99% efficient.
-  iHeat units have safety controls to reduce or eliminate scalding.
-  iHeat units are designed to repair or replace components which extends the life of the unit.

Water Savings and Space Savings

-  Saves up to 40% on energy
-  Install closer to the faucet or the point of use ... no venting consideration.
-  Up to 90% smaller than a tank water heater.
-  Free up floor and closet space ... "floor hog vs wall hung".

Electric or Gas Tank Water Heaters vs iHeat Electric Tankless

-  Tank failures are a nightmare and remediation for water damage is very expensive.
-  Average life of a tank water heater is 10 – 12 years vs 15 – 20 years for tankless.
-  Eliminate 40-60 gallons of hot water storage ... 7/24/365.

Customer Satisfaction and Convenience

-  When properly sized, iHeat units efficiently produce endless hot water.
-  Locate iHeat tankless units closer to faucets and use; dramatically reduce wait-time.
-  Quicker hot water without having to pay for costly recirculation loops
-  Endless applications ... 100% of US homes and business have electricity.

Why iHeat Electric Tankless Water Heating

-  Do you want to save water, space, energy/money and get end-less and on-demand hot water?
-  Do you have a garden tub that you would like to fill with hot water?
-  Teenagers ... when was the last time you took a hot shower?
-  If you were taking a trip tomorrow, would you crank your car today?
