

Packaged Heat Pump with Puron Refrigerant

MODEL PH3Z

Bryant's Most Affordable Packaged Heat Pump

Earning Your Trust Since 1904

Competition for consumer confidence is tougher than ever. That's why Bryant continues to build on a foundation of delivering comfort... reliability... and value that started back in 1904. We've earned our reputation through a commitment to continuously meet and exceed the changing needs of homeowners just like you. Today, as consumers face increasingly difficult decisions on the products they choose, Bryant responds with our most affordable packaged heat pump - the Model PH3Z.

The Bryant Model PH3Z delivers solid, reliable comfort at 13 SEER (Seasonal Energy Efficiency Ratio) cooling efficiency and up to 7.7 HSPF (Heating Seasonal Performance Factor) heating efficiency. It offers durability built in with our high-tech composite base. Add our durable compressor, corrosion-resistant copper tube aluminum fin coil, and attractive durable cabinet, and it's easy to see why Bryant backs the Model PH3Z for years of dependable, worry-free comfort.

Peace of Mind

Having a great warranty helps you enjoy your comfort with confidence. Bryant builds trusted reliability into every product, then provides additional peace of mind with excellent warranty protection.

To the original owner, the Bryant Model PH3Z packaged product is covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Ask your Bryant dealer about optional extended warranties, which may include labor.

*Warranty period is 5-years if not registered within 90-days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts warranty. See warranty certificate at Bryant.com for complete details.

Environmentally Sound Puron® Refrigerant

Designed specifically for use with Puron® refrigerant, the Model PH3Z provides an environmentally sound solution for the scheduled phase-out of Freon®-22*. Freon-22, the industry standard refrigerant for many years, is being taken out of production due to environmental concerns. As it becomes

less and less available, costs to service heat pumps using Freon-22 may rise (an idea supported by the rise in costs to service automobile air conditioners using the phased-out Freon®-12*). By choosing Puron now, you are making a decision that is both environmentally and financially sound.

Performance

Home Comfort Components

- 1 ENERGY EFFICIENT**
Our compressor is designed for use with Puron® refrigerant to provide quiet, smooth-operating comfort and years of trouble-free performance.
- 2 QUIET OPERATION**
Is attributed to the fan blade. The unique design moves air with less noise and turbulence for quieter, more efficient operation.
- 3 32" NARROW CABINET DESIGN** (all sizes) allows a perfect fit for zero lot line installations.
- 4 DURABILITY AND INDOOR AIR QUALITY**
Built with a high-tech composite material, Bryant's premium base will not rust. Sloped design and integrated drain minimize standing water to improve indoor air quality by inhibiting mold, bacteria and algae growth.
- 5 LASTING LOOKS AND PROTECTION**
Exterior cabinetry is coated with a rugged baked-on enamel finish to provide superior scratch and corrosion resistance.
